OXYGEN TOXICITY:
HYPEROXIA AND THE RISKS TO THE PULMONARY SYSTEM

PROGRAM OVERVIEW
The purpose of this program is to educate clinicians on the pathophysiological effects and clinical implications of exposing neonates to hyperoxia. A case study is also provided. Techniques for assessing tissue oxygenation are outlined to help clinicians assess a patient’s oxygen requirements and reduce unintended oxygen exposure. These Webinars, as well as a question-and-answer session, will be conducted by a Mallinckrodt Clinical Nurse Educator.
